

PRODUCT INFORMATION SHEET

14 Piece Flat Ring Spanner Set with Articulated Joint

Product description

Tool cabinet insert containing flat ring spanners with articulated joints. The spanners are used for unscrewing and screwing threaded connections ending with a hex, bi-hex or hex TORX element. Thanks to the ratchet there is no need to reposition the spanner.

Charakteristics

- spanners made of high-grade chrome-vanadium alloy steel;
- press-formed panel provides greater resistance;
- chrome-plated surface with a matt finish effectively protects against rust, while making it easier to keep spanners clean;
- Bi-hex ratchet ring spanner with 72 teeth guarantees considerably faster work even in narrow spaces – stroke of 5°;
- 15° offset spanners make work in hard-to-reach places much easier;
- articulated joint for operation at an angle between 0 and 90°;
- hard and flexible technical foam.

Set includes

Flat ring spanners with joint: HT1R048 (8 mm), HT1R049 (9 mm), HT1R050 (10 mm), HT1R051 (11 mm), HT1R052 (12 mm), HT1R053 (13 mm), HT1R054 (14 mm), HT1R055 (15 mm), HT1R056 (16 mm), HT1R057 (17 mm), HT1R058 (18 mm), HT1R059 (19 mm), HT1R060 (20 mm), HT1R061 (21 mm).
