

PRODUCT INFORMATION SHEET

A table for service work

Product description

Mobile workbench, ideal for car engine servicing.

The worktop can be placed directly above the motor thanks to the H-shaped base. This allows the table to be slid in despite the mounted wheel.

The table is a functional 2-in-1 tool: a service tabletop and a mobile tool tray.

It can be adjusted to the ergonomic requirements of the work and the height of the serviced vehicle, thanks to height adjustment in the range from 86 to 120 cm.

The design and solid materials ensure a load capacity of up to 30 kg.

The table can be easily moved and quickly secured in place thanks to 4 swivel TPR castors and a lock.

Numerous compartments allow you to keep your tools and small parts tidy.

The table is ideal for workshops, car repair shops and garages.

Characteristics

- Maximum load capacity - 30 kg;
- height - 86-120 cm;
- width - 60 mm;
- length - 79 mm.
